

# Sure-Check™ Sterilization Pouches

## The only way to be SURE about sterilization.

- Built-in multi-parameter internal/external process indicators that change color when all three criteria for sterilization have been met – time, temperature and the presence of steam.
- Manufactured from medical-grade paper with extra-wide chevron to protect against instrument breaching, thumb-notch for easy opening, 6 corner tack seals to prevent curling and other potential contaminants from entering pouch upon opening and a perforated fold to help ensure the adhesive strip forms an airtight seal.
- Eliminates the extra step of adding separate multi-parameter indicators to each pouch.
- Once sterilized, contents will remain sterile for up to three years, provided the integrity of the pouch has not been compromised.
- Meets CDC Guidelines for Disinfection and Sterilization in Healthcare Facilities 2008.
- Meets ANSI/AAMI ST79 Comprehensive Guide to Steam Sterilization and Assurance in Healthcare Facilities.
- Tested and certified by independent third-party laboratory.
- For use with steam and EtO sterilization processes only.

## Sterilization Pouches

### Because You Can't See Sterile™, be sure with Sure-Check™ Pouches.

**Thumb Notch** - Assures easy opening of pouch.

**Internal/External Multi-variable Indicators** - Only change color when all three criteria for sterilization have been met: **time, temperature and the presence of steam.**

**Medical Grade Paper** - Wet strength treated, virgin medical grade paper that meets medical pouch standards.

**Transparent Film** - Allows a clear view of the contents as well as the internal indicators.

**Wide Self-Seal Adhesive Strip** - Wider sealing area of strip securely seals pouch and provides sterilization integrity of contents during storage. Contents will remain sterile for three years provided the integrity of the pouch is not compromised.

**Corner Tack Seals** - Three tack seals on each corner prevent curling and possible separation after sterilization, while also preventing the collection of dust and other contaminants in the sealed area.

**Secure Seal** - Extra wide chevron to protect against instrument breaching.

**Complete Film/Paper Separation** - The high quality of the materials and manufacturing process ensures a consistently clean separation (peeling) of the film from the paper, maintaining the sterile integrity of the contents.

**Perforated Fold** - Allows for accurate folding of adhesive strip to form an airtight seal, maintaining the integrity of the pouch during storage after sterilization.
